\$10,027.79; per piece, 2.5 mills; per carrier, \$815,65; postage on local matter, \$1,873.96.

The report also shows an increase of five cities in the free delivery posteffices, and 210 more carriers than the preceding year. The whole number of pieces handled by carriers than the preceding year. gregates 1,510,554,117, an increase of 215, o New York in the number of pieces handled. An English Sailer's Tribute to a Yankee Sailer's Yarn Dana was the first man to look at the

world know it as a real thing. America hould be proud of that triumphant book, 'Two Years Before the Mast." We are a great maritime people: the oceans of the workl are our realm, and every billow that rolls from north to south, from east to west, carries a British interest along its to show us how to write a book that should be true to the sailor, true to the ship he sails in true to the deep he navigates? For my part, I heartily begrudge Boston for her famous "yarner," and for the hon-or of this country could wish that his grand sea picture had the Union Jack hanging over it instead of the Eagle that is perched at all times upon its frame. The difference between "Two Years Be-fore the Mast" and most of the nautical novels which have been written on this lovels which have been written on this ide the Atlantic is the difference between

e marine drama, as we are accustomed witness it in London and provincial eatres, and the calling it caricatures ana's book is a solid fact from beginning to end—not one jot more so because i forms a collection of his experiences when at sea, than because of the superb sailor like spirit, the exquisite accuracy and the great hearted sympathy that every page is full of. "I vowed," he says, after de scribing the flogging on board the Pilgrim. "I vow that if God should ever give me the means I would do something to redress the grievances and relieve the to redress the grievances and relieve the sufferings of that class of beings with whom my lot has so long been cast." He could not have gone to work more effectally than by writing "Two Years Before be Mast." It was time that somebody nowed the public down into the merchant hip's forecastle, pointed to the bunks in

which the sailors sleep, the dripping car-lings, the evil smelling slush lamp, the water splashing through the scuttle, the poor clothes of the heavily worked men, the infamous food and vile water on which they substited. It was the sail of the substited of the sail of they subsisted. It was time, I say. No landsman could guess the truth, and those who had suffered, who could speak of the horrors of scurvy from darkness and damp, and fare such as a hog might disdain, were ignorant and unable to put their story before the world. But then comes Dana, a fine genius, full of spirit. He shipped as a foremost hand in a little brig bound round Cape Horn to the Western Augustian coast and he world the story. American coast, and he spent three years of his life among sailors, working with them, suffering with them, taking their few pleasures with them. We are used to his book now, and since his time plenty of interest has been taken in the merchant ervice; but I sometimes think that an ex-raordinary amazement must have been excited among those of the public who cared for sea yarns when "Two Years Before the Mast" was first published. By what mag-ic Dana absorbs the attention of his read-

ic Dana absorbs the attention of his read-ers by a plain, unvarnished narrative of forecastle life in a little brig? But that was not quite it. How did it happen. I dare say people wanted to know, that these poor sailors who so deeply interest-ed them in Dana's work were so utterly unlike the mariners they had been accus-tomed to read about since the days of Smollett! Where was the Saturday night mollett! Where was the Saturday night Smollett! Where was the Saturday night larking! where the cans of grog! the "wives and sweethearts!" the dancing on the main deck! the gay uniforms, the handsome middies, the sea battles, the lovely heroines, and all the rest of the well known stuff! Instead of this they found a brutal, course mouthed skipper, a couple of mates nother handsome nor sentimen-

of mates nother handsome nor sentimen-al, and forward an odd collection of rude and rough figures in Scotch caps and old shirts. There was no heroine, there was no fighting, there was no herome, there was no fighting, there was nothing more spirit-ed in the way of diversion than a fandan-go at Santa Barbara; but there was the best of all things in this world—truth. Because of it the book went straight home to the heart, and inasmuch as that it is as true in the main of life on board ship to day as it was when written forty-five years ago, there can be no excuse for any

one desirous to write for or against the sailor not to very fairly understand the nature and duties of Mercantile Tack's life while "Two Years Before the Mast" remains in print,—W. Clark Russell in the Contemporary Review Type-Writing Girls.

Type-Writing Girls.

The stenographer is rapidly being succeeded by the type-writer. Men are two clumsy to acquire great facility at this sort of work, and it seems especially suited to women. The advantage which it possesses over the older fashion is that the work is finished when the operator has reached the end. A large element of uncertainty enters into life when one employs a stenographer. With the type-writing girls it is different. As a rule they are busy copying supreme court writing garls it is different. As a rule they are busy copying supreme court papers, which, by the way, they lay asids without the slightest regret, and they apparently are the only people who look with contempt uponthe supreme court, and begin at once to prepare for work. The preparation is the longest part of it. After a few general remarks about the weather, she removes her rings one after the other, looks at them carefully places them in an

contempt uponthe supreme court, and begin all once to prepare for work. The preparation is the longested part of it. After a few general semants about the weather, a few general semants are supremented to this market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market, and we Invite our Friends to give them an Imported to this Market the Invite our Friends to give

average stenographer, and when you have finished dictating you may take the manuscript away with you. I have observed one peculiarity about the female handwriter. She never makes a mistake. It is always the machine. If she puts sixteen vowels in the word "through," she first hits the keyboard violently, then raises the roof of the structure, pokes at the type with her first finger, indulges in some airy criticisms of the manufacture, brings the whole thing together violently again, and continues to make the most

- HAVE again, and continues to make the mos grievous and absurd errors with a face of Bark Ceylon utter satisfaction and unruffled high spirits, She eventually marries the man-

aging clerk of the law office.—Brookly

Sears are always unsightly, and are of en painful or inconvenient, on account of their propensity to contract as they be come older. Dr. Wark, of New York, as serts that they may be removed by mani-pulation, which he directs to be employed as follows: Place the ends of two or three fingers on a scar if it be a small one, and on the margin if it be large, and vibrate the surface on the tissues beneath. The surface itself is not to be subjected to any friction: all the motion must be between the integument and the deeper parts. The location of the vibratile motion should be changed every 10 or 15 seconds until the whole scar has been treated, if it be a moderate size. If the scar be the resul of a large scald or burn, the margins only should be treated at first: the advances toward the center should be deferred un til the untrition of the margins has been decidely improved. Only a little treat ment should be applied to any one spot at the same time, but the vibrations should be repeated as many as 20 times a day, but never with sufficient frequency or severity to cause pain. If the scar be-comes irritable, suspend treatment until it subsides. In the course of two or three weeks of faithful treatment, the surfaces of the scars of moderate size becomes mo movable, and will begin to form wrinkle like true skin, when pressed from side to side. All these changes are due to improved nutrition, consequent on better blood circulation—the development of en-tirely new sets of blood vessels in the circuen life as a real thing, and to make the tricial tissue.—N. Y. Sun.

The Indiana Way.

A minister residing in a town in Indiana was hurriedly sent for one day to conduct the services over the remains of a farmer to be buried from his home in the country. In the hurry and excitement, added to the fact that est, carries a British interest along its puid path. Is it not wonderful that we would have waited for a Yankee student show us how to write a book that should be true to the sailor, true to the ship he

"Death comes to all. Though the deceased was stricken down in the bloom of life, she—"
"It was the old man," whispered one of the friends at the minister's elbow. "Although in the prime of life, he knew that eath was liable to come at-" "He wasn't in his prime, but was 70 years old," whispered the friend. "Although he was an old man," resumed the clergyman, after swallowing a lump in his throat, "he will be greatly missed by a large circle of friends and relations. Death-"

circle of friends and relations. Death—"
"Didn't have a friend or relation except the old woman," put in the man.
"Although, as I said, he may not be missed in his home," said the now thoroughly embarrassed minister, "his church will sadly realize the vacancy. He joined the Baptist Church at an early—"

"Always trained with the Methodists," whispered the friend.
"He joined the Methodist Church years ago, and has always been an en—"

and has always been an en-"
"Only joined last winter!"
"He was a gentleman," observed the clergyman, with great effort, "He died full of faith

"He isn't dead at alf—he's only in a trance!" yelled one of the crowd nearest the ceffin, and the next moment the old man sat up, looked around for a minute and then called out:

"Must be mighty near time to feed them hogs; somebody gimme my breeches and boots."—

Ecchange.

A Darling Doctor.

"There is a big difference in doctors, I (ell There is a big difference in doctors, I tell you," said an old-time Spruce street doctor to me the other day. You think you knew something about 'em, but you are still in the fluif and bloom and kindergarten of life. Wait till you've been through what I have."

"Where, for instance?" I asked him.

"Well, say nothing about anything else, just look at the doctors we had in the war. We had a loctor in the lock as it which renders them not only an excellent drink had read for its way.

had a doctor in our regiment that looked as if he knew so much that it made him unhappy. I found out afterward that he ran a kind of cow foundling asylum in Utah before the war and when he had to prescribe for a human be

ing it seemed to kind of rattle him.
"I fell off'n my horse early in the campaign and broke my leg, I rickelect, and he set the hone. He thought that a bone should be set similar to a hen. He made what he called a od splice, but the break was above the knee and he got the cow idea into his head in a way that set the knee behind. That was bad. "I told him one day that he was a blamed fool. He gave me a cigar, and told me I must be a mind reader.

"For several weeks our colonel couldn't eat anything, and seemed to feel kind of billions. He didn't know what the trouble was until he went to the doctor. He looked at the colonel a few moments, examined his topgue, and told im right off that he had lost his cud. "This doctor was always telling his triumples in surgery. He did save a good many lives, loo, toward the close of the war. He did it in

"He had about one more year to serve and with his doctoring on one side and the hostility of the enemy on the other, our regiment was were down to about 500 men. Everybody said we couldn't stand it more than another year One day however, the doctor had just meas ured a man for a porus plaster, and had laid the stub of his eigar carefully down on the top of a red powder keg, when there was a slight atmospheric disturbance, the smell of burnt clothes, and our regiment had to apply for a

new surgeon.
"The wife of our late surgeon wrote to have her husband's remains forwarded to her, but I told her it would be very difficult to do so, owing to the nature of the accident. I said, however, that we had found an upper set of store teeth imbedded in a palmetto tree near by, and had buried them with military honors, erecting over the grave a large board on whice was inscribed the name and age of the decease

"Not dead, but spontaneously distributed.
Gone to meet his glorified throng of patients.
Ts, ts, vain world." Phila. Paper.

Telephonic.

The witty paragrapher and the funny man of the newspapers have recently struck a new lead in recounting the amusing mistakes which may occur by operators giving the wrong party to a subscriber, or switching off some of

who has begun a conversation and connecting him with others who are talking.

A sample story is about a customer who rang up his butcher to inquire what he had put in the last sausage sold him. Before the butcher could respond the operator disconnected him and the customers has interested him and the customers has interested. ted him, and the customer was let into a versation between two men about a well w had just been cleaned, and the one who talking was relating what he had found in it.
The customer only heard "two dead cats, three rats, and—" when he threw down the telephone in horror, and the agonies of a chole patient were endured by him for the next hor
